[Suite 9.7.5 Keygen Set Up](#)

8.3 Add Idles

- Open **GamePlay > Animations...** A window will open where you have to define Idles for your Mod
- Expand on **Actors\Character\Behaviors\0_Master.hkx > LOOSE**. This is the place where you define all your Idles
- Right-click on **"LOOSE"** and click **"Insert Child"**
- Enter ID **"MSPM001"** and select the corresponding Anim Event **"MSPMTriple_H_01"**. Again you are free to use ID, so you could use the name of the AnimEvent for the Idle as well. But since it will be easier to assign idles to the script I simply enumerate them.
- Click on any other LOOSE Idle definition, so your changes are accepted.
- Define the next idle **"MSPM002"** with AnimEvent **"MSPMParade"**. That should do it for the purpose.
- Close.
